1 Scope

This European Telecommunication Standard (ETS) defines the conformance specification for the Medium Access Control (MAC) layer management, as defined in ETS 300 273 [1].

2 Normative references

This ETS incorporates, by dated or undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed below. For dated references, subsequent amendments to or revisions of these publications apply to this ETS only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies.
